

## POLLINATOR PLANTS

Plants that attract pollinators not only benefit native bee populations, they also benefit butterflies and honeybees. An added benefit is that these prolific blooming plants add year round beauty to you garden and home environment. Additional practices such as Integrated Pest Management and creating habitat for ground nesting bees also assist pollinator populations in our community. We all play a part in making our environment better and healthy. Let's do our part. Here are just a few of great pollinator plants you can consider.

### Trees

Silk Tree, Albizia  
 Flowering Plum  
 Flowering Cherry  
 Linden Tree  
 Redbud Tree

### Vines

Honeysuckle, Lonicera  
 Trumpet creeper, Campsis

### Deciduous Shrubs

Butterfly bush, Buddleia  
 Caryopteris  
 Currant, Golden & Red  
 Elderberry, Sambucus  
 Fuchsia  
 Flowering Currant  
 Flowering Quince  
 Lilac, Syringa  
 Oceanspray  
 Service Berry  
 Weigela

### Perennials/Annuals

Agastache  
 Alstromeria  
 Asters  
 Bee Balm, Monarda  
 Black Eyed Susan  
 Blanket Flower, Gaillardia  
 Bleeding Heart, Dicentra  
 California Fuschia  
 Calendula  
 Catmint

### Perennial/Annuals, cont.

Columbine  
 Coreopsis  
 Cosmos  
 Coneflower, Echinacea  
 Crocosmia  
 Delphinium  
 Goldenrod  
 Lavendar  
 Foxglove, Digitalis  
 Geranium  
 Gladiolus  
 Heuchera  
 Hellebores  
 Hollyhock  
 Lobelia  
 Lupine  
 Marigold  
 Milkweed  
 Penstemon  
 Cosmos  
 Poppy  
 Primrose  
 Red Hot Poker  
 Rosemary  
 Russian Sage  
 Sage  
 Sunflower  
 Scabiosa  
 Sedum  
 Veronica  
 Sweet William  
 Thyme  
 Zinnias

### Bulbs

Crocus  
 Camas

### Evergreen Shrubs

Abelia  
 California Lilac, Ceanothus  
 Cotoneaster  
 Lonicera  
 Manzanita  
 Privet, Ligustrum  
 Oregon Grape, Mahonia  
 Photinia  
 Firethorn, Pyracantha  
 Salal  
 Strawberry Tree, Arbutus  
 Viburnum
